

## who we are

Whiting-Turner's growth and success is attributable to the belief in and strict adherence to the core values established in **1909** by our founder, G.W.C. Whiting, and exemplified by subsequent presidents Willard Hackerman and Timothy Regan.

Whiting-Turner is perennially ranked in the top five in domestic building construction by Engineering News-Record (ENR), with over 60+ locations nationwide.

## what we do

Whiting-Turner provides **construction management, general contracting, design-build and integrated project delivery services** on projects small and large for a diverse group of customers. We constantly strive to exceed each client's expectations through innovation, collaboration and best practices.

Despite our firm's substantial size, we have structured our company in such a way that no client or project gets lost in the shuffle. We have created individual operating groups throughout the country that work in specific market segments. These teams work on a variety of projects that range from small laboratory renovations to large research buildings.

## culture of safety

For a project to be successful, it must be safe. Whiting-Turner instills a culture of safety in each of our employees in the earliest stages of their careers. We know from experience that our safety program, planning and training is tremendously effective, which allows our highly skilled teams to continue to build on our industry-wide reputation for safety excellence.

## building nationally. serving locally.

## diversity & inclusion

We recognize the value of diversity and foster an **inclusive environment built on collaboration, communication and respect**. People are our most valuable assets, and we are committed to providing equal opportunity and advancement for all of our employees and trade partners. We are a leader in providing opportunities for disadvantaged firms on some of the nation's largest and most prestigious projects.

## science & technology expertise

With our long history of building science and technology facilities in the Northeast and across the country, our expertise spans across many fields in the industry, including:

- ✔ Laboratories
- ✔ Vivariums
- ✔ Nanotechnology
- ✔ Pharmaceutical

We know how to manage the challenges and intricacies that come with building these complex buildings. Our science and technology professionals are highly skilled and fully understand the importance of controlling each project's cost, quality, schedule and the safety of your personnel and your valuable work.
