

## BioCT Facilities & Lab Operations (FLO) Roundtable

BioCT's Facilities & Laboratory Operations (FLO) Roundtable is a highly sought-after, biannual series that brings together leaders in lab and facility management from across Connecticut's life sciences ecosystem. Each session features a curated panel of top experts in the lab operations space, creating a dynamic, peer-driven conversation around best practices, shared challenges, and forward-looking solutions.

We invite professionals in laboratory management, facilities, and operations roles within life science companies and academic institutions to join this in-demand forum and be part of the conversation shaping more efficient, sustainable, and strategic lab environments.
